

Minnesota Structural Engineers Association Young Member Group

Family (Engineering) Feud Night
The Opus Group Headquarters - Minneapolis, MN
February 19, 2019

The survey says that the MNSEA YMG hosted an exciting mock Family Feud event with an engineering twist, called "Engineering Feud." Prior to the engineering feud, our YMG surveyed over 55 senior level structural engineers from the greater MNSEA MO. Questions ranged from "What are some tasks that should be completed during a site visit?" to "What are some strategies to avoid the black box syndrome when using engineering software?" The responses were tallied, an engineering feud was held at the Opus Headquarters where one of our MNSEA MO members hosted the event (Steve Harvey denied our multiple requests for an appearance). YMG members were split into teams of two and battled it out! The winners took home some Caribou Coffee and Chipotle gift cards.

After the event, the YMG circulated the survey results to the greater MO. It was a great collaboration between the greater MO and the YMG!
