**SEAoNY's 2nd Annual YMG Trivia Night**  
New York, NY  
September 25, 2017

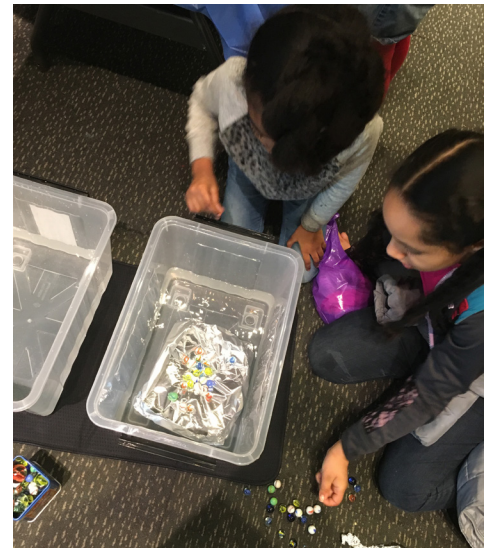

SEAoNY's YMG hosted their second annual Young Member Pub Trivia Night allowing their young members to enjoy a night of engineering and pop culture trivia. The event attracted over 50 participants including young member participants from 13 different firms, and students from universities in the area. The top three teams won gift cards and every participant received a free museum pass to the Queens Museum's "Never Built New York" exhibit thanks to the donation of the passes from the Queens Museum.

Following trivia, the young members were provided the opportunity to network with participants from other teams and discuss their trivia answers. The event closely coincided with SEAoNY's annual meeting and membership renewals to encourage YMs to register as members of their MO.

**SEAoNY Volunteers for Kid's Day at the New York Hall Of Science**  
New York, NY  
February 19, 2018

On President's Day, members from SEAoNY's YMG, alongside local college students and ACSE members volunteered for the Metropolitan Section's Kid's Day Event, part of National Engineer's Week. Held at the New York Hall of Science in Queens, the museum normally offers interactive exhibits geared at introducing kids to the world around them through a scientific lens. On this day, however, we took over one of the exhibition halls and hosted over 350 kids aged between three and thirteen for a fun day involving some challenging activities including the foil boat, paper bridge, paper tower and gum-drop tower challenges, where kids constructed the designated object from a limited amount of material and then had to test their design with weights and marbles. Along with the last activity, Jenga, the attendees were forced to think analytically and were able to improve their designs with each successive attempt!

We had a great time volunteering at this event introducing the future engineers of this world to some of the fundamental concepts of our profession and we look forward to coming back next year. This was one of SEAoNY's first community outreach events, and we hope to offer more opportunities for YMs to give back in the coming months.

**SEAC and ASCE YMG Happy Hour**  
Resolute Brewing, Centennial, CO  
April 17, 2018

The SEAC and ASCE Young Member Groups joined forces for a happy hour event on Tuesday, April 17th at Resolute Brewing. Between the two organizations, around 18 young engineers and industry associates stopped by for the opportunity to mingle and enjoy appetizers sponsored by the ASCE YMG. The event also celebrated the individuals who sat for the PE and SE exams the previous weekend with a delicious cake.

**Night at the World Trade Center Observation Deck**  
One World Trade Center  
April 25, 2018

On Wednesday, April 25th, the SEAoNY Young Members Group hosted a “Night at the World Trade Center Observation Deck.” About 100 engineers came out to network while atop the tallest building in the Western Hemisphere. While clouds initially obstructed the view, the poor visibility worked in our favor as SEAoNY had the entire observation deck to themselves. Attendees were also treated to a private talk about the structural engineering behind the WTC.

By the end of the night, the clouds lowered to reveal breathtaking views of the Empire State Building and other iconic Manhattan structures. Participants enjoyed informal networking, using the opportunity to describe their notable projects to their peers, as buildings like Hudson Yards began to emerge through the clouds.
