

## Structural Engineers Association of Georgia Young Member Group

### Dewalt/Powers Hands-in-Anchor Demo + TopGolf

November 15th, 2016

TopGolf Atlanta

Members of the SEAOG YMG gathered in the Top Golf Atlanta parking lot for a hands-on demonstration of Dewalt/Powers anchors. The demonstration included proper installation of different anchor types; including drop-in, mechanical, screw, and epoxy anchors. After proper technique of each anchor was shown, young members lined up to install the anchors themselves. This was a great way for young engineers to learn the pros and cons of each anchor during field installations, and help with them become more knowledgeable when specifying these different type of anchors on their drawings. After drilling and fastening in the parking lot, the young members moved indoors to TopGolf for a few drinks and a lot of golf.
